

Online Resume

Hello! I'm Jordan Yip, a student from the University of PolyU .
Majoring in Information System and Web Technologies, I am passionate about creating impactful digital content. My academic journey is marked by consistently exploring the intersection of technology, media.

About Me

As a student from the University of PolyU majoring in Information System and Web Technologies, I am a creative thinker and problem solver, always studying

the latest trends and methods in digital content creation. When I'm not engrossed in my coursework or working on my own media projects, you can find me sketching out new ideas or pouring over academic texts on the way technology, media, and society influence each other.
